

Put People Generated Data at The Heart
of Your Security and Management Systems

Mirobase
mirobase.pro

Why Mirobase?

Mirobase provides a first-class solution for managing insider risks and staff performance for the sustainable development of thousands of enterprises around the world

5,519 Clients in 21 countries trust us

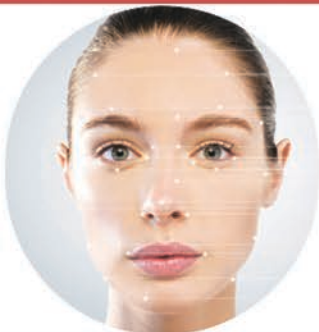

Security innovations: Handwriting Recognition

Each person has their own keyboard writing style and Mirobase can recognise a person by from typed text

Face ID, Face Recognition

AI recognises the employee who most frequently use a computer and denies access to other people

Screen Photo Prevention

AI detects when someone takes a photo of a desktop and automatically prevent this by locking the workstation

Reports for performance management: Individual Behaviour

Get a portrait of the daily activities of each employee in your unit

Group Behaviour

Compare portraits of the daily activities of all employees in your unit

Compare Units

Identify differences in the behaviour of employees of productive and poorly performing organisational units

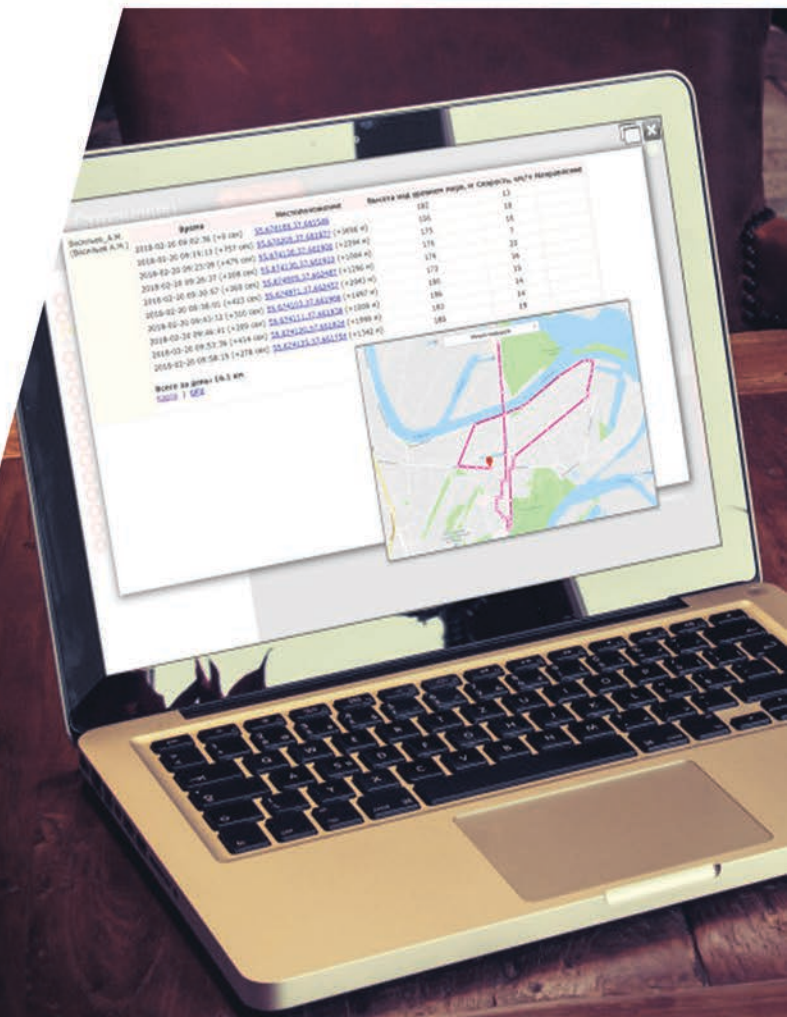

Corporate data is the new «black gold»

Companies that are capable of extracting and managing staff-generated data will achieve greater sustainability and will be able to survive any crisis

Mirobase architecture

Mirobase installs on all office and remote workers' personal computers. Mac and Windows are supported and work without reducing OS performance

Mirobase Server

Mirobase Server installs on Windows Server and collects data from up to 100 000 Mirobase Agents. Microsoft SQL and MySQL databases are supported
